### P. E. BAND MAY PERFORM IN TORRANCE

### C. C. to Have Elaborate Program at 4th District Meeting

At the weekly meeting of the directors of the Chamber of Commerce held Tuesday afternoon the request of the California Development Association that several hundred copies of local Chamber of Commerce literature be sent them for distribution at the Grand Central Palace in New York during the annual Travelers Show, was granted.

A letter from the local post of the American Legion thanking the directors for the compliment paid the former in placing the arrangements for the Fiesta in their hands was received. The letter stated that a later communication would contain their decision in the matter.

The following residents of Torrance were admitted to membership in the chamber by unanimous vote: L. C. Kitzmiller, E. E. Stanley, John Bergstrom and Guy L. Mowrey.

Attention was called to the Forum meeting to be held in Legion Hall next Monday night and to the Fourth District Chambers of Commerce meeting to be held early next month. Secretary Gadeky informed the directors that he thought it possible to get the services of the Pacific Electric band for the latter occasion.

The secretary was instructed to draw up a resolution of condolence to be sent the family of the late M. F. Shepard of Moneta, who was the first president of the Fourth

### When Is A Vehicle A House? Is Asked

The question as to whether a house on wheels is a building, structure or vehicle, was a poser for the city trustees Tuesday night when the matter of the lunch wagon, now occupying a vacant lot opposite the Tool Company's plant, being subject to the provisions of the fire ordinance, was discussed.

The matter was too much for the city dads and the burden was shifted to the shoulders of the city attorney, who was asked to report his findings that the city might compel its removal if it was found to be a "structure or building" within the meaning of the fire ordinance.

District chambers and who for many years has been an active worker for the interests of this section.

It was suggested that Secretary Gadeky invite the secretary of the Automobile Club of Southern California to visit Torrance with a view to looking over the sign situation along the several boulevards leading to this city. In many instances the name "Torrance" is entirely omitted.

Director Neill addressed his brother directors on the subject of the action of the realtors in Torrance, who Tuesday afternoon organized and who were bent on raising a considerable fund to be used in outside newspapers in advertising this city. He lauded the organization and the publicity campaign it is about to inaugurate and recommended that the directors as individuals and collectively get behind the movement.

Oakdale — Western Engineering & Construction Company laying out camp to accommodate 700 men.

San Francisco — \$1,000,000 business block and theatre being erected on Union street.

The year 1923 promises to be a great one for large construction enterprises in Northern California. The Southern Pacific has appropriated \$10,000,000 for building the Natron cutoff in Southern Oregon; the Western States Gas and Electric Company has a big project under way on the American river; the Great Western Power Company is adding a new unit to its big Caribou plant and now comes the announcement by John A. Britton, vice-president and general manager of the Pacific Gas and Electric Company, that this company is preparing to spend between \$17,000,000 and \$18,000,000 in further hydro-electric development on the Pitt river and in construction of additional transmission lines. This will add another 100,000 horsepower to the company's capacity. Less than five months ago it added its new Pitt river plant No. 1 with 93,834 horsepower but it now finds it must add another unit immediately to care for future demands. California is the greatest hydro-electric state in the union and Mr. Britton is the dean of hydro-electric development in the West.
